CSC104 Exercise #1

Assume that DrRacket has been started up in the Intermediate Student with lambda language, and that the following command has been run:

(require picturing-programs)

Describe or draw what DrRacket produces for the expressions below. What type of value (string, number, image, boolean) is produced in each case?

(string-length "scatter")

(above ♦ ♠ ◆)

(+ 1 2 3)

(flip-vertical ♦)

(< 5 3)
