Outline

privacy

mutation

Notes

share, but don't share

- bank info
- image.
- phone #

- medical history

Richard Stallman
of GNU
refused
password
- denied
to have
secret.

- don't operate
- computer
- paper + pencil
- neuron.

NSFNET T3 Network 1992

information wants
to be shared...
how much?
with whom?

privacy, pro or con?

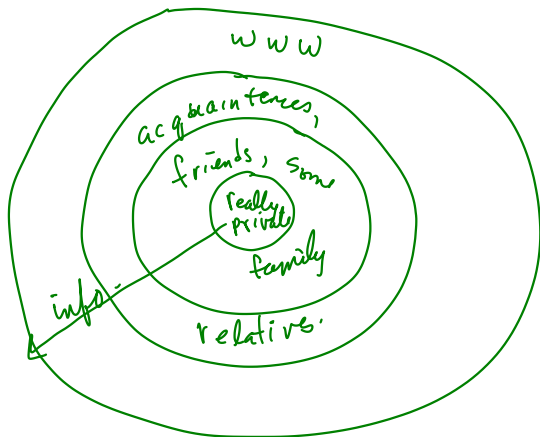

make your lists...

Guess most are somewhere
in the middle
- privacy is negotiated "right"
many would withhold privacy
from conspirators but
grant it to "regular folks"

concentric circles of privacy

who fits where?

privacy leaks

know privacy's plumbing

buyer loyalty plans what do they for those “deals”?

surveys not just an interruption

credit information who knows you paid late?

recorded viewing check the agreement

black boxes not just for crashes

911 where's waldo?

rfd bar codes, shopping history, drugs?

computer use what's your admin see?

cookies where have you been browsing?

required leaks

can lose your identity

Being born, working, imprisoned, or paying taxes, can generate information about you that you aren't allowed to keep private. How many of these do you think are necessary to identify an American with more than 80% accuracy (according to Dr Latanya Sweeny)?

- ▶ hospital of birth
- ▶ date of birth
- ▶ gender
- ▶ postal code
- ▶ blood type

what can you do?

increase privacy and security

- ▶ passwords and pins
- ▶ know something about contacts
- ▶ update security software, OSs
- ▶ careful when you click

Public
key

PGP
GPG

Free

2048-bit key
crack it should take
decades "They" take
to crack.

For important stuff encrypt

how badly broken was that phone?

was: GATAAATCT

1. GACTATTAC
2. GATAAAACT
3. GATCTA
4. AGTCTAG
5. CBAC
6. KAC
7. CAGT
8. GATC
9. ATCG
10. ACTGATG
11. ACGTATG

edit distance 2-3

GATAAACT
-GATCTA-

edit distance

10, 11 have edit-distance 2

Notes

koch-0 → —

other wise

(beside (koch (sub1 d)
(rotate 60 (koch (sub1 d))))
(rotate -60 (koch (sub1 d))))
(koch (sub1 d)))
