

CSC104 tutorial exercises #5

This tutorial is meant to give you some practice with big-bang models that are not images.

My office hour: Wednesdays 5:10–6, in SF1101 (our classroom).

Your tutorial: Wednesdays 6:10–7:00. Tutorial sections are as follows:

| Surname | Tutorial section | Room | TA |
|---------|------------------|--------|------------|
| A–C | section 1 | BA3175 | Omar |
| D–J | section 2 | BA3185 | Nahla |
| K–L | section 3 | BA3195 | Dhinakaran |
| M–T | section 4 | BA2220 | Nick |
| U–Z | section 5 | BA2220 | Yashuai |

DCS Help Centre: Monday–Thursday, 4–6 pm in BA2230, see [Help Centre page](#). Khaled, a TA from our course, is in the Centre Monday, Tuesday, and Thursday.

1. You will work on some exercises from [Chapter 8 of Picturing Programs](#). If you encounter an unfamiliar command (or one that used to be familiar, but no longer is), try
 - (a) Type the command in DrRacket, hover your cursor on it, and then right-click, in order to see documentation, or
 - (b) Look for the command in [Picturing Programs](#)
 - (c) Ask another student, or a TA, how it works
2. Work on exercises 8.21–8.23 in [Chapter 8 of Picturing Programs](#). You may find the command `place-image` helpful in 8.23
3. Work on exercises 8.31–8.35 in [Chapter 8 of Picturing Programs](#).
